

Targeted e-Learning (FM-031)

OVERVIEW

COURSE OBJECTIVES

Our targeted e-learning safety modules allow for vehicle operators to receive crucial training remotely with live results and reporting. Seamlessly allocate our pre-designed content to drivers for completion or have your own bespoke content created into modules to meet your current and future training needs as a business. Modules are approximately 20 mins with interactive content and knowledge check questioning throughout with a final assessment upon completion. Manage all driver records through our employer e-learning centre which can be accessed by the booking manager to track progress against modules set, individual or group results to spot trends and allow for careful and impactful risk management.

WHO SHOULD ATTEND?

Vehicle operators selected for training for developmental or intervention purposes.

Various certification options available

20 mins approx. per module

Online workbooks and information guides available

Full secure record management through the e-learning centre

Remote
