Safety Workshops (Half or Full Day)

Course description

Workshops are an effective tool when managing the road safety for groups of employees. With targeted interactive content, workshops can be used to inform colleagues of significant changes to company best practice, changes in legislation, awareness of changing road related risk, support the introduction of new technology (such as AFV's) and to support internal safety campaigns and messages in an efficient and engaging manner.

You have the choice of booking a set topic workshop that is more technical in content for a half or full day or selecting two modules from the build a course selection to form a half day workshop. Topics include, but are not limited to;

- Interactive Road Safety
- Bubble Your Vehicle
- Speed Awareness
- Fatigue and Wellbeing
- Bespoke Content
- Sharing the Road Space
- Vulnerable Road Users

Get in touch to discuss your required topic(s).
