

Course description

Manoeuvring, parking and reversing slow speed collisions are some of the most common incidents experienced by drivers.

This training is designed to assist drivers who have been involved in a slow speed manoeuvre incident, whether this be during loading, parking or navigating at low speeds around site.

The training ensures that sufficient skills and knowledge are in place to take control of low-speed situations in a safe manner to protect the vehicle, street furniture and individuals in the immediate area.

Who is the course for?

- Vehicle operators who have been involved in a slow speed close quarter incident.
- Vehicle operators who would benefit from slow manoeuvring, parking and reversing training as they do not feel confident manoeuvring safely.

Key facts

Half Day
Full Day

1 - 4 colleagues per session
