FM-009 – Skid Recognition and Control

FLEETMASTER GROUP

Course description

Skid recognition is an essential skill that all drivers should have at least an awareness of. Learning how to prevent and correct should a dangerous situation develop is a basic driving skill to protect colleagues whilst driving on company business.

Drivers will learn the core driving techniques to avoid skid situations and gain an understanding of skid recovery techniques. Drivers will gain the skills to predict hazardous and potential skid situations and be equipped with the skills to avoid reaching the point of no return and the potential harm and injury that would inevitably happen as a result.

Digital assessment reports are accessible to employers post training and provide the detail of the training and a risk rating to help employers manager their ongoing risk removing the unknown.

Who is the course for?

Any driver that would benefit from skid recognition and control to build confidence or as an intervention post incident.
