

Product description

My-DRM is an innovative cloud based platform leading the way in fleet management and compliance, simplifying mass data into a central point making action and decision making easy for compliance professionals.

My-DRM connects all existing systems and records seamlessly for both drivers and assets, allowing for accurate management of key compliance data from a single source.

My-DRM performs live analysis of data to determine an accurate risk score for vehicle operators and has the capability to automate corrective learning.

Connected Compliance

-  Integrated Telematics
-  Live Driver Risk Scoring
-  Licence Checking
-  Record Management
-  Automated eLearning
-  Vehicle and Driver Cost Analysis
